CMMI

Question 1

Process Areas in CMMI Level 1 and their implementation in Developed vs Developing Countries.

Process Areas :

- None, work is ad-hoc, chaotic and dependent on individual heroics

Implementation In Developed Countries

Applied in fast-moving startups and indie dev teams using Agile / Kanban boards, GitHub, and basic automated testing with minimal paperwork.

Implementation In Developing Countries

Applied in small software houses using informal messaging (Whatsapp / Slack), unorganized requirement

Date: _____ Day: _____

and live server manual testing

Question 2

Process Areas in CMMI Level 2 and Level 3 and Their Implementation in Developed vs Developing Countries

CMMI Level 2 (Managed)

Process Areas:

- Requirement Management
- Project Planning
- Project Monitoring and Control
- Supplier Agreement Management
- Measurement and Analysis
- Process and Product Quality Assurance
- Configuration Management

Implementation in Developed Countries

Managed via Jira / Azure Dev Ops backlogs, automated CI/CD pipelines, automated unit tests, and Gitflow branching

Date: Day:

Implementation in Developing Countries

Managed via formal SRS documents, Gantt chart / Trello boards, manual QA testing teams, and periodic, client sign-offs

CMMI Level 3 (Defined)

Process Area

- Organizational Process Focus (OPF) and Definition (OPD)
- Organizational Training
- Integrated Project Management
- Risk Management
- Decision Analysis and Resolution
- Requirements Development
- Technical Solution
- Product Integration
- Verification and Validation

Implementation in Developed Countries

Standardized across the enterprise using cloud DevOps blueprints, automated security / risk tools (Snyk / SonarQube), LaunchDarkly feature flags and Architecture Review Boards.

Date: Day:

Implementation in Developing Countries

Standardized using centralized company wikis/Notion guidelines, periodic manual risk matrix reviews and structured UAT sign-offs with client.
